EXPERIENCE

Security Operations Center (SOC) Analyst

Kohler Co – (Contract via TEKsystems)

December 2024 – June 2026

- Investigated threats across 20,000 endpoints using CrowdStrike Falcon, supporting incident containment and response
- Correlated endpoint and SIEM telemetry to identify malicious activity and support threat investigations
- Managed access for 30+ third party vendors through PAM solutions, enforcing least privilege principles
- Issued and renewed hundreds of internal PKI certificates for servers, workstations, and mobile devices
- Conducted identity and endpoint investigations using Active Directory, supporting access control reviews
- Collaborated with security teams to tune detections, improve alert fidelity, and document incident response activities

Information Security Associate

University of Wisconsin Milwaukee

June 2022 – May 2024

- Managed endpoints for 27,000+ users using Microsoft Defender and Cisco Secure Endpoint (AMP)
- Investigated account compromises, and phishing campaigns using Microsoft Defender and Azure AD
- Reduced phishing click rates by 18% over 2 years through targeted awareness initiatives and detection improvements
- Built Power BI dashboards to visualize phishing trends and attack frequency

Aircraft Mechanic - Secret Clearance (inactive)

Wisconsin Army National Guard

April 2016–2023

- Maintained mission-critical UH-60 aircraft in high-tempo operational environments.
- Led maintenance teams while ensuring compliance with technical standards and documentation.

SKILLS

- **Security Operations:** Rapid7 InsightIDR, CrowdStrike Falcon, Microsoft Defender, Cisco Secure Endpoint (AMP)
- **Detection & Response:** SIEM, EDR, Detection Engineering, Threat Hunting, Incident Response, Vulnerability Management, MITRE ATT&CK, Microsoft Sysmon, Atomic Red Team, Wazuh
- **Infrastructure & Identity:** Active Directory, Azure, Palo Alto, Guardicore, PAM, PKI
- **Operating Systems & Scripting:** Windows, Linux, Ubuntu Server, Python, PowerShell, Git

EDUCATION

BS in Information Science and Technology

University of Wisconsin – Milwaukee

Honors in the Major

UWM Cybersecurity Certificate

CERTIFICATIONS

CompTIA Security+

April 2024

CompTIA CySA+

October 2025

CompTIA Security Analytics Professional

TECHNICAL PROJECTS

Detection Engineering Lab (Wazuh • Sysmon • Atomic Red Team)

- Deployed a Wazuh SIEM lab on Ubuntu Server with Windows and Linux endpoints for security monitoring
- Developed and validated custom Wazuh detection rules using Microsoft Sysmon telemetry and Atomic Red Team attack simulations, including detection of PowerShell EncodedCommand execution
- Mapped custom detections to the MITRE ATT&CK framework and documented the complete detection engineering workflow through a personal cybersecurity portfolio

Python Security Scanner

- Developed a Python application that inventories Windows systems, analyzes installed software, open ports, and running processes, and generates HTML security assessment reports
- Published source code and technical documentation through GitHub and a personal cybersecurity portfolio
