Professional Summary

Military Veteran & Security Analyst with 3.5 years of hands on experience in security operations, threat detection, incident response, vulnerability management and identity security. Experienced supporting enterprise environments with over 20,000 endpoints using CrowdStrike Falcon, Rapid7 InsightIDR, Palo Alto, Microsoft Defender, and PKI solutions. Skilled in security investigations, threat hunting and access control management.

SKILLS

Rapid7 InsightIDR SIEM, Python, CrowdStrike Falcon, EDR, Incident Response, Threat Hunting, Vulnerability Management, Palo Alto, Microsoft Defender, Azure, Active Directory, Proofpoint, PAM, Guardicore, PKI

EXPERIENCE

Security Operations Center (SOC) Analyst

Kohler Co – (Contract via TEKsystems)

December 2024 – Present

- Investigate and triage threats across 20,000+ endpoints using CrowdStrike Falcon EDR, supporting incident containment and response
- Conduct threat hunting and investigations using Rapid7 InsightIDR SIEM to identify and respond to security threats
- Manage Palo Alto firewall policies within a global enterprise environment reducing exposure risk
- Configure and manage access for 30+ third party vendors through PAM solutions, enforcing least privilege principles
- Issue, renew, and revoke hundreds of internal PKI certificates for servers, workstations, and mobile devices
- Conduct identity and endpoint investigations using Active Directory, supporting incident response and access control reviews
- Collaborate with cross functional teams to document incidents, tune detections, and reduce false positive alert volume

Information Security Associate

University of Wisconsin Milwaukee

June 2022 – May 2024

- Managed endpoints for 27,000+ users using Microsoft Defender and Cisco Secure Endpoint (AMP)
- Investigated account compromises, phishing campaigns, and suspicious logins using Microsoft Defender and Azure AD
- Reduced phishing click rates by 18% through targeted awareness initiatives and detection improvements
- Improved security posture by recommending and implementing new tools and operational procedures
- Built Power BI dashboards to visualize phishing trends and attack frequency

CERTIFICATIONS

CompTIA Security+

April 2024

CompTIA CySA+

October 2025

CompTIA Security Analytics Professional

October 2025

EDUCATION

Bachelor of Science in Information Science and Technology

May 2024

University of Wisconsin – Milwaukee

Thesis: Developed a machine learning model in Python to identify phishing and scam messages

OTHER EXPERIENCE

15H Aircraft Pneudraulics Mechanic – Secret Clearance (Inactive)

Wisconsin Army National Guard

April 2016 – April 2023

- Deployed as part of an Aviation Support Battalion to the Middle East (2017-2018)
 - Led teams maintaining 30+ aircraft worth \$150 million+, diagnosing hydraulic and pneumatic systems
 - Ensured compliance with technical orders and quality control requirements
 - Produced accurate and concise technical documentation to support maintenance continuity
-

MY PROJECTS

Security Homelab

- Built security lab environment using network segmentation, system hardening, and simulated attacks
- Configured Windows and Linux systems to evaluate security controls and monitoring capabilities
- Performed threat detection testing and vulnerability assessment exercises
